Guitar Body Dwg Files

You've finally worked out the kinks by prototyping with foam and perhaps even ran an MDF body to see how it looks.. This in combination with our busy college lives (18+ hours a semester) turned 'DIY Custom Electric Guitars' into 'Custom Electric Guitar Bodies'.. *Also attached is the drawing for the head on Lenny's Custom Guitar Neck, lovingly dubbed Teh Beast.. ALWAYS WEAR EYE/EAR PROTECTION WHEN NEEDED Secure your foam blank in place on your tooling.. This is also for your use if you wish 123D Gallery File Links Attachments • Time to prototype in Foam! Safety first, common sense is a must and never work alone, yada yada yada.. All of our designs have to do with cleaning the environment up, as well as true green energy, among other things.. First you'll need to draw your guitar, or use an existing drawing Lenny's Custom Guitar Rev2 is attached, for your use.. The files are in dwg IF you require them in a different format you may email me at KK4BPS @ QSL.. (Picture of Laurel Falls attached) Enough of my rambling, on the 'ible :) - Christian and Lenny.

crv (924 5 KB) Here are the files I used while building this The extra 'holes' in the V-Carve files are something I was considering as a chambered design to reduce weight.. Hopefully we will be able to finish this instructable later and be able to share the guitar making process with everyone here at Instructables! If we win we will be using our ShopBot to make custom guitars, of course, but we have much bigger plans.. You can share and edit this file, just don't sell it People > Musical Instruments > Electric Guitars 3D Models Show: View as: Sort by: Per page.. Free Dwg Files LibraryThis is an entry to the ShopBot Contest Its been a long time in the making.. NET (without the spaces) Notes about Lenny Custom Guitar R2 Drawing: *The drawing has a neck pocket sized for a store bought 22-fret neck.. It should fit your neck, but measure to be sure It can always be resized *The pickups for this guitar are Gibson Burstbuckers, but any Humbuckers should fit these pockets.. If I try to rush a safety spiel I will miss something so for now your off the hook.

Lenny and I have been planing this instructable for quite a while The contest got us to try and hurry up, unfortunately we ran into many obstacles.. Again measure to be sure, this is why you need some basic CAD skills (and foam).. We have many generator ideas as well as designs for other projects that we wish to prototype.. You can share and edit this file, just don't sell it Please give credit if redistributing.. *The electronics pocket is fairly small You may need to adjust the size depending on your configuration as well as your electronics skills.. First you'll need to draw your guitar, or use an existing drawing Lenny's Custom Guitar Rev2 is attached, for your use.. Safety is a priority, but I'm going to assume if you can program and run your router you know basic safety procedures.. We used our schools old and worn AXYZs Our foam prototype was 1/4' off on either end of a pass, from a slipping Z drive.. We even have a few things we want to develop and share here, along with many projects simply for fun.. Georgia Luthier Supply: 2D CNC - Electric Guitars - Acoustic Guitar Plans, Luthier Tool Plans, eBooks & eMusic, Ukulele Plans, Free Tool & Jig Plans, Other Instrument Plans, Electric Guitar Plans, 3D CNC Files.
